

SENCEIVE

HAREKET İZLEME SİSTEMİ

GENEL BAKIŞ

Farklı boyutlardaki yer altı ve yerüstü yapıların kablosuz olarak profesyonelce izlenmesini sağlar

- Güvenli
 - Düşük/bakım gerektirmez
 - Emniyetli
 - Uzun Kullanım(15 yıla kadar)
 - Kolay kurulum
 - Güç/ Kablosuz iletişim
- Hassas ve stabil data
- Uygun maliyetli.....

- Deformasyon
- Gerilme
- Yük
- Piezometrik basınç
- Su seviyesi
- Eğim
- Toprak basıncı
- Zemin nemi içeriği
- Çökme/Kabarma
- Kayma/Hareket
- Salınım/Ovalleşme
- Ray takibi
- Ray sıcaklığı
- Daralma/Açılma

Farklı alanlarda, farklı yapılarda izleme yapılabilir....

Optik Mesafe Sensörü

Optical Sensor Specifications

Parameter	Value
Resolution	0.1mm
Repeatability	±0.15mm
Range	50 metres (natural surface) 100 metres (white target) 150 metres (reflecting target)
Laser Type	Class 2, 655nm (visible red)

Tilt Sensor Specifications (-IX Version)

Parameter	Value
Resolution	0.0001° (0.00175mm/m)
Repeatability	±0.0005° (±0.0087mm/m)
Range	±90°

Milivolt Sensör

Millivolt Sensor Interface

Parameter	Value
Connector	M12 Female 5-pole A-coded Screw-in Type
Range	$\pm 0.625V$ ($\pm 125mV/V$)
Resolution	74.5nV (14.9nV/V)
Repeatability	$\pm 2.5\mu V$ ($\pm 0.5\mu V/V$)
Stimulus	5.0 \pm 0.1V 150mA max

Internal Battery

Parameter	Value
Battery Type	Lithium Thionyl Chloride
Nominal Voltage	3.6V
Nominal Capacity	19000mAh
Typical Battery Life	12-15 years at 20/30 minute reporting intervals, including when acting as a relay node Assumes a resistive bridge load of 350 Ω *

Sıcaklık Sensörü

RTD Interface

Parameter	Value
Connector	M12 Female 5-pole A-coded Screw-in Type
Accuracy	< 0.1°C
Resolution	< 0.01°C
Temperature Range	< -40°C to >85°C
Stimulus Type	Constant Current

Tilt Sensor (-IX Variant Only)

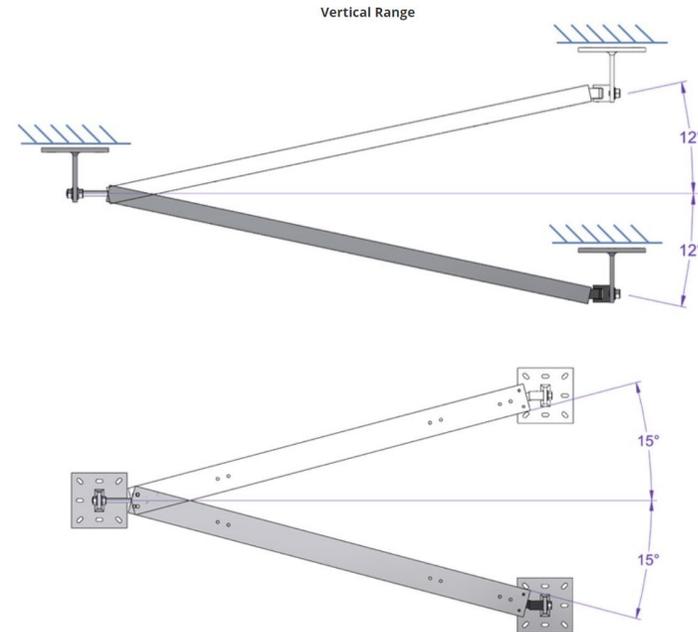

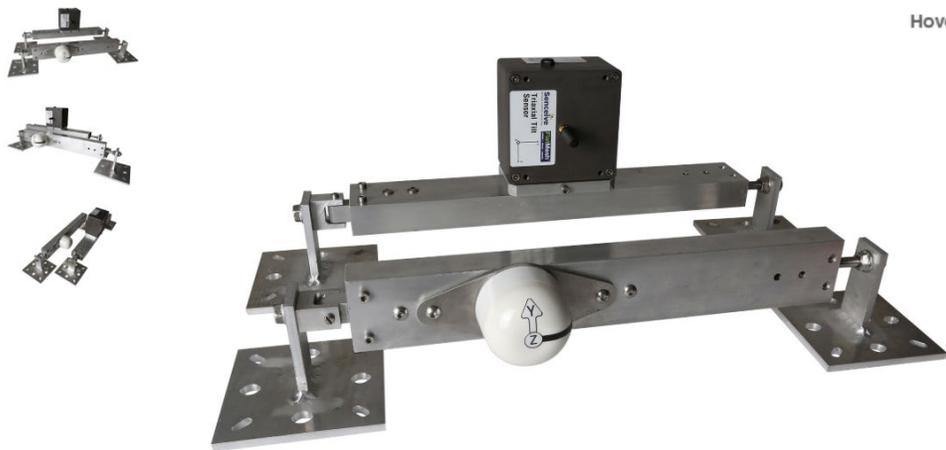

Parameter	Value
Resolution	0.0001° (0.00175mm/m)
Repeatability	±0.0005° (0.0087mm/m)
Range	±90°

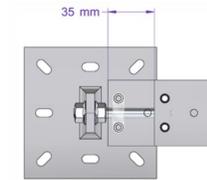

FlatMesh Tilt Beam Sensörü

Physical Specifications

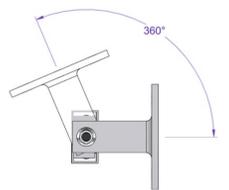

Parameter	Value
Beam Dimensions	500mm, 1000mm, 2000mm, 3000mm (custom lengths available on request)
Support Bracket Dimensions	Base: 100x100mm Height: 75mm
Total Mass (without node)	2kg (approx. for 2m beam)
Material	Aluminium with A2 stainless steel fasteners

Expansion Range

Rotational Range

Ordering

Step 1 - FlatMesh Tilt Beam:

Beam length is specified using the part numbers below. The length refers to the distance between the support bracket centres.

Part No.	Description
FF-BK-500	FlatMesh Tilt Beam 500mm
FF-BK-1000	FlatMesh Tilt Beam 1000mm
FF-BK-2000	FlatMesh Tilt Beam 2000mm
FF-BK-3000	FlatMesh Tilt Beam 3000mm
FF-BK-Cxxxx	Custom Length (xxxxmm) FlatMesh Tilt Beam

3 Eksenli Eğim Sensörü

Tilt Sensor Specifications

Parameter	Value
Resolution	0.0001° (0.00175mm/m)
Repeatability	±0.0005° (±0.0087mm/m)

Internal Battery

Parameter	Value
Battery Type	Lithium Thionyl Chloride
Nominal Voltage	3.6V
Nominal Capacity	19000mAh
Typical Battery Life	12-15 years at 20-30 minute reporting intervals, including when acting as a relay node. *

* Consult with Senceive for your application

Çatlakölçer Sensörü

Crack Sensor Interface

Parameter	Value
Circuit Topology	Voltage divider
Stimulus	2.5V, 100mA max
Resolution	0.0015% of full scale
Noise Level	0.005% of full scale (typical peak to peak)

Internal Battery

Parameter	Value
Battery Type	Lithium Thionyl Chloride
Nominal Voltage	3.6V
Nominal Capacity	19000mAh
Typical Battery Life	12-15 years at 20/30 minute reporting intervals, including when acting as a relay node

Kablolu Titreşim Sensörü

Vibrating Wire Interface

Parameter	FM3N-VW11 / VW17	FM3N-VW41
Connector	M12 Female 5-pole A-coded Screw-in Type	M12 Female 12-pole A-coded Screw-in Type
Frequency Resolution	0.001 Hz	
Frequency Repeatability	±0.02 Hz	
Frequency Range	200-6500Hz	
Stimulus Type	Swept Sine Wave, typ. 6V peak to peak	
Thermistor Type	3kΩ NTC	
Temperature Resolution	0.05	
Temperature Accuracy	±0.1°C	
Temperature Range	-40°C to +85°C	

Internal Battery

Parameter	FM3N-VW11 / VW17	FM3N-VW41
Battery Type	Lithium Thionyl Chloride	
Nominal Voltage	3.6V	
Nominal Capacity	19000mAh	34400mAh
Typical Battery Life	12-15 years at 20/30 minute reporting intervals, including when acting as a relay node*	

Nano 3 Eksenli Eğim Sensörü

Key Benefits

- High performance and sophisticated platform in discrete package
- Tri-axial tilt sensor
- No external aerial and a durable shell (IP68 rated)
- 0.0001° (0.0018mm/m) resolution in 3 axes
- Highly stable and repeatable data ($\pm 0.0005^\circ$ / $\pm 0.009\text{mm/m}$)
- Enhanced noise reduction algorithms
- Explicitly designed for Rail and Construction sectors
- Up to 100 sensors in one network
- Industrial levels of data reliability/throughput – 99.9%
- Wide range of fixings allow for quick installation to any surface
- Easy to use graphical interface
- 1 year battery life for the Nano and 5 years battery life for the Nano+
- Range of up to 100m
- Totally wire and mains power free solar powered GSM data backhaul option
- Robust data backhaul solutions for any under/over ground environment
- Ability to interface with any user/ client monitoring systems
- Event triggering/ Intelligent data processing at node level
- Remotely adjustable sub 1-minute reporting rates
- Custom alerts and triggers
- Remote firmware upgrade capability
- Gateway back-up and auto switchover

3G Gateway

FlatMesh Radio Specifications

Parameter	Value
Communication Type	Proprietary FlatMesh v3 Mesh Networking Protocols IEEE 802.15.4 compliant
Frequency Band	2400 – 2485 MHz ISM Band
Maximum Transmit Power (EN 300 328 v1.8.1)	6.2dBm
Maximum Antenna Gain	4dBi
Range	Up to 300m depending on the environment*
Maximum Network Size	Typically, up to 100 nodes
RF Module	Consult with Senceive to determine the optimal system configuration Senceive FM3Gateway

* Consult with Senceive for your application

Cellular Radio Specifications (Standard)

Parameter	Value
Frequency Bands for GSM/GPRS/EDGE	850 / 900 / 1800 / 1900 MHz
Frequency Bands for UMTS/HSPA+	800 / 850 / 900 / 1900 / 2100 MHz
Output Power	Class 4 (+33dBm) for EGSM850 / EGSM900 Class 1 (+30dBm) for GSM1800 / GSM1900 Class E2 (+27dBm) for GSM 850/900 8-PSK Class E2 (+26dBm) for GSM 1800/1900 8-PSK Class 3 (+24dBm) for UMTS 800/850/900/1900/2100,WCDMA FDD Bdl, BdII, BdVIII, BdV, BdVI
Maximum Antenna Gain	+3.5dBi
Supported Sim Cards	3V and 1.8V
RF Module	Gemalto PH8-P

USB Gateway

USB Interface

Parameter	Value
Standard	USB 2.0
Connector Type	Standard A Plug
Cable Length	1 metre
Type of Device	Virtual COM Port
Power Requirement	5V, 500mA max

Certifications

- Tested to conformity with all the essential requirements of Radio Equipment Directive 2014/53/EU and RoHS Directive 2011/65/EU
- Network Rail Acceptance PA05/04146
- London Underground Approved

FlatMesh Kamera

Physical Specifications

Parameter	Value
Dimensions excluding pole bracket	336 x 174 x 302 mm
Dimensions including pole bracket	356 x 305 x 302 mm
Total Mass	5.6 kg*
Housing Material	Extruded aluminium with plastic end caps
International Protection Marking	IP66
Mounting Options	Wall mounting bracket included with one-screw rotation and tilt adjustment Pole mounting bracket adaptor also available
Operating Temperature Range	-20°C to +50°C

* Approximate values only

Imaging Specifications

Parameter	Value
Maximum Image Resolution	1600 x 1200 pixels
Shutter Type	Rolling shutter
Scanning	Progressive
Lens Focal Length	6mm for standard configuration
Angle of View	Approximately 35° wide, 25° high (6mm lens)
Compression Format	JPEG

Infrared Illuminator Specifications

Parameter	Value
Power	48W
Wavelength	940nm (invisible to the human eye)
Beam Angle	35° wide, 10° high for standard configuration Other configurations are available
Range	Approximately 60m in standard configuration*

Case study: Shell Centre - London Underground

Site commercial redevelopment – Demolition and rebuild

Senceive system around tunnel and on track

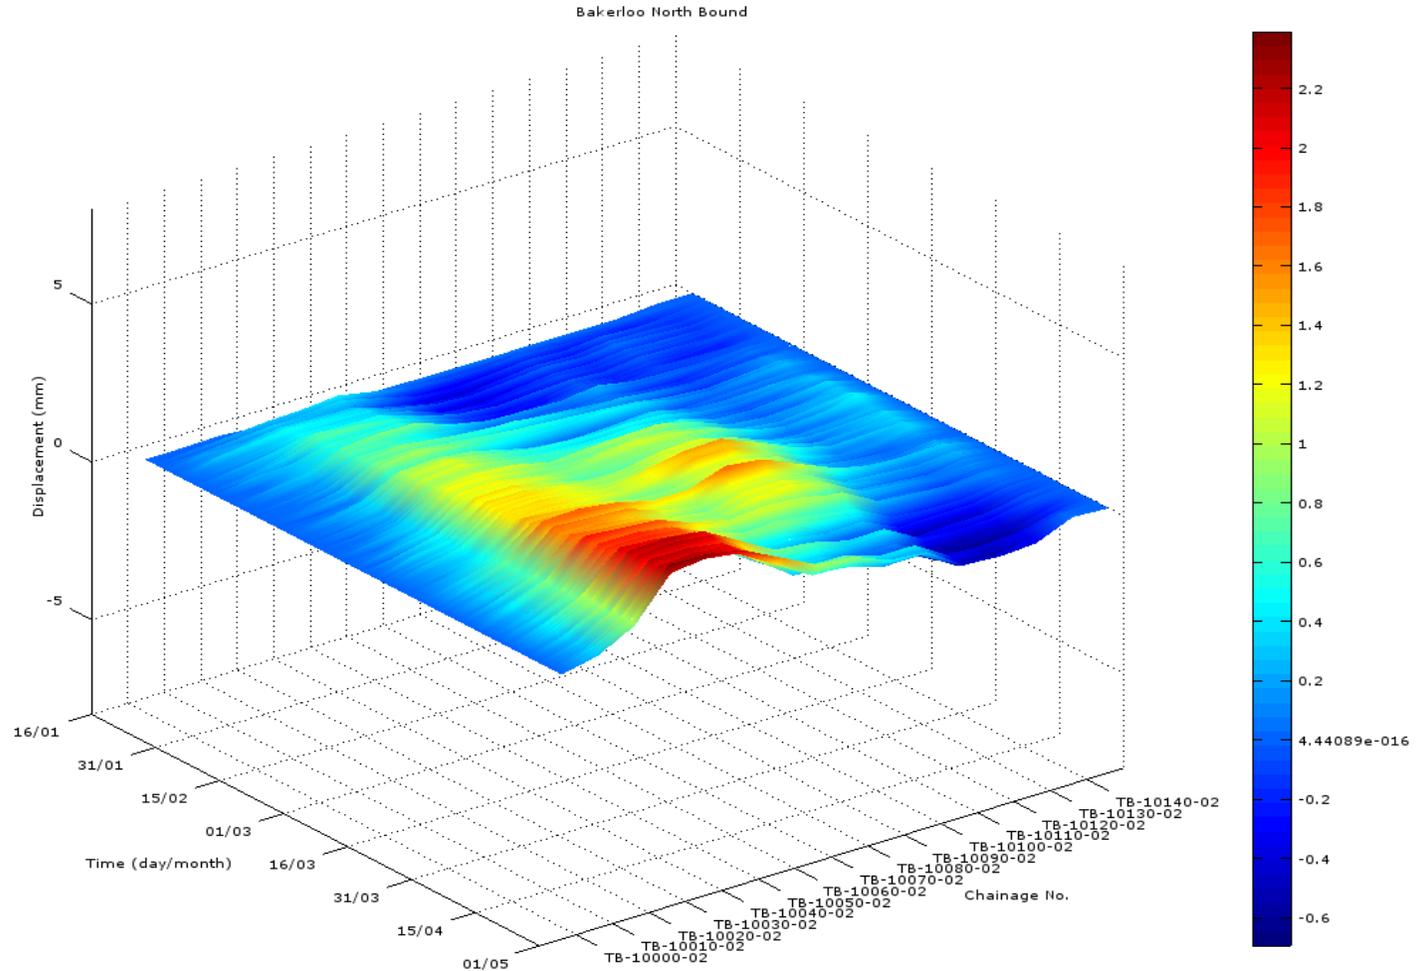

- 400 sensors monitoring deformation, convergence and longitudinal movement on LUL assets
- 4 LU tunnels on lining and on track-bed @ 10m centres

Shell Centre- Longitudinal movement over time

- Able to see 2mm of heave during early phase demolition
- Exact correlation with manual/precision levelling

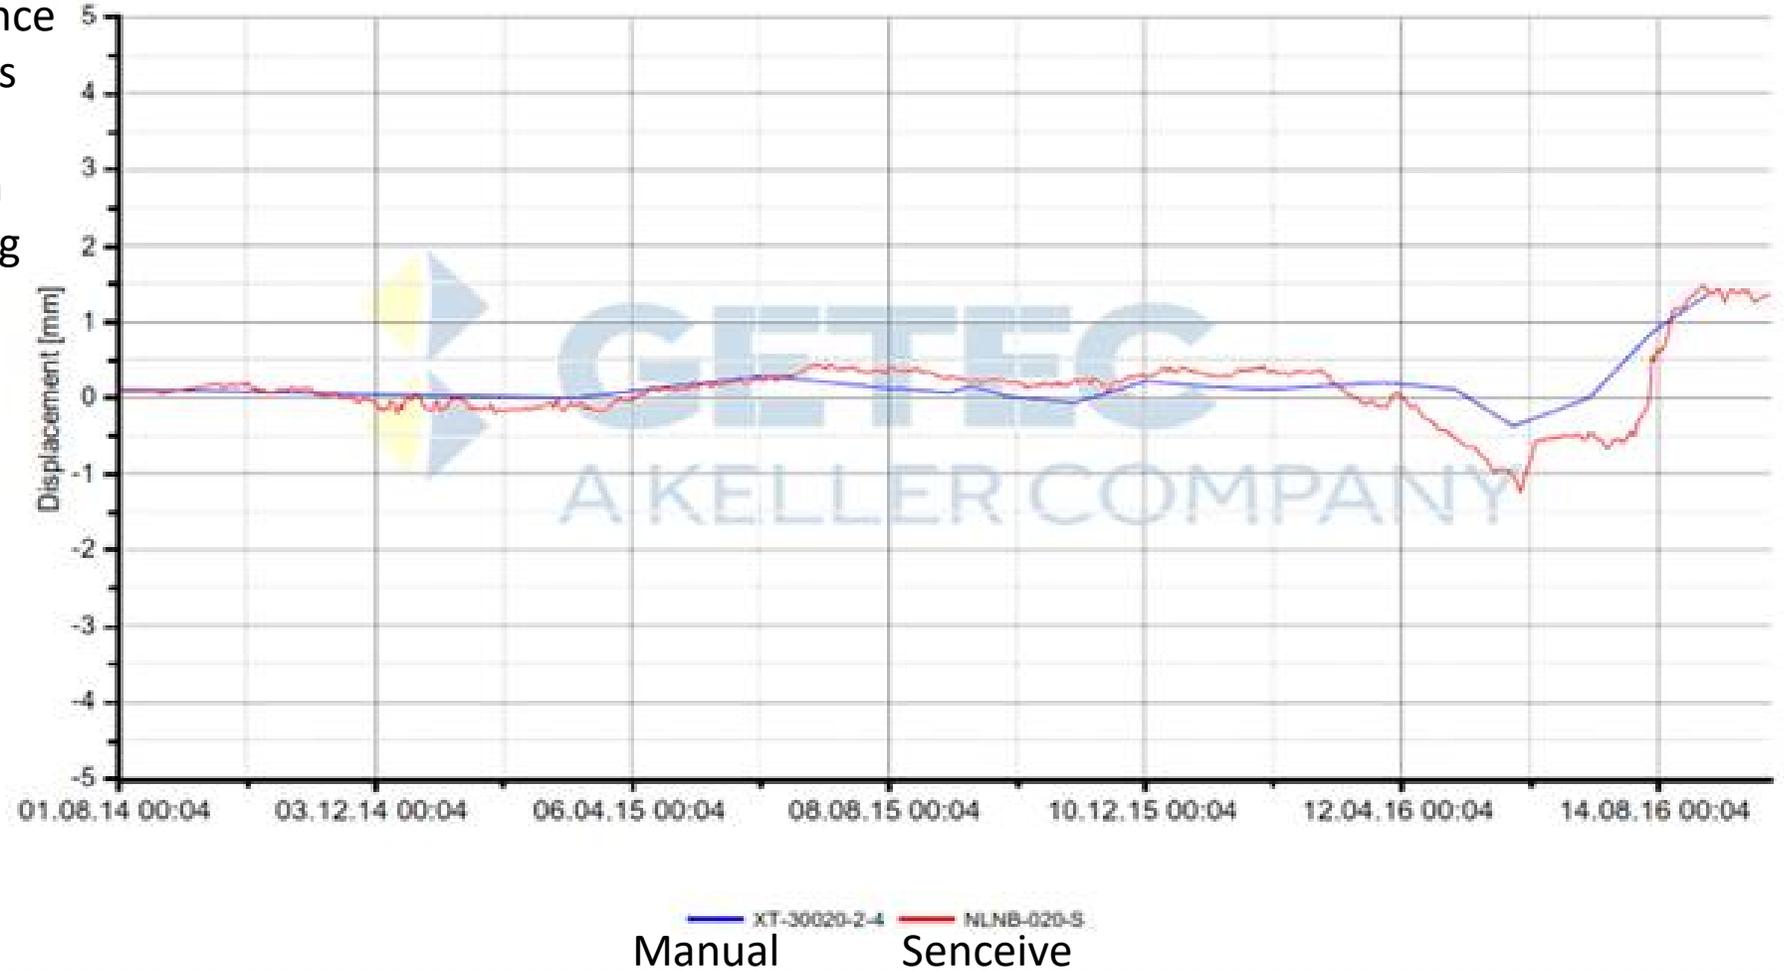

Shell Centre- Longitudinal movement over time

- Able to see 7mm of heave during later demolition
- Excellent correlation with manual/precision levelling

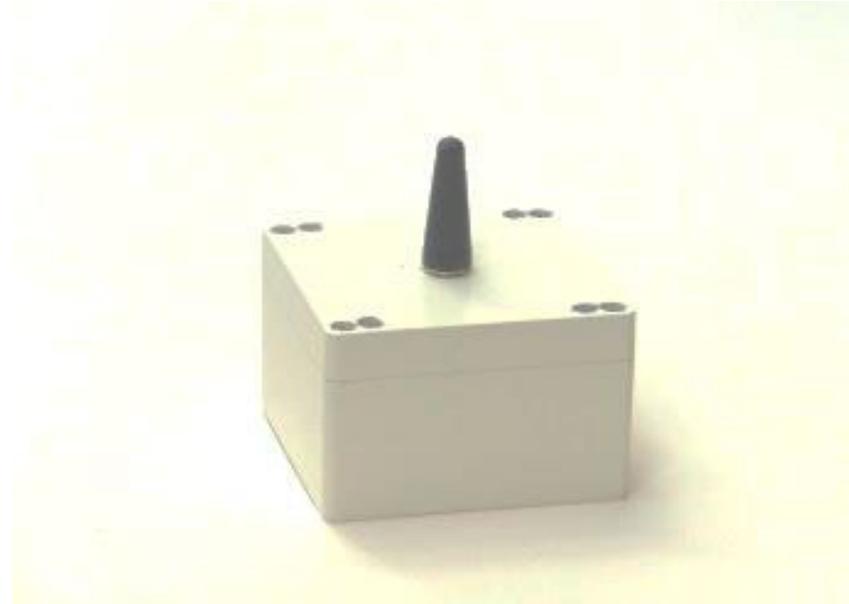

Shell Centre- Convergence movement over time

- Able to see tiny convergence accuracy over long periods
- Excellent correlation with manual/ precision levelling

Senceive system

- High Precision stable tri-axial tilt sensors
 - Steel Beam Mount
 - 15 minute interval measurements/auto triggering faster reporting
 - 3 month period pre, during, post construction
- Senceive System
 - Precision: $\pm 0.001^\circ$ / $\pm 0.018\text{mm}$
 - Accuracy: $\pm 0.003^\circ$ / $\pm 0.053\text{mm}$
 - Supported with visual inspections

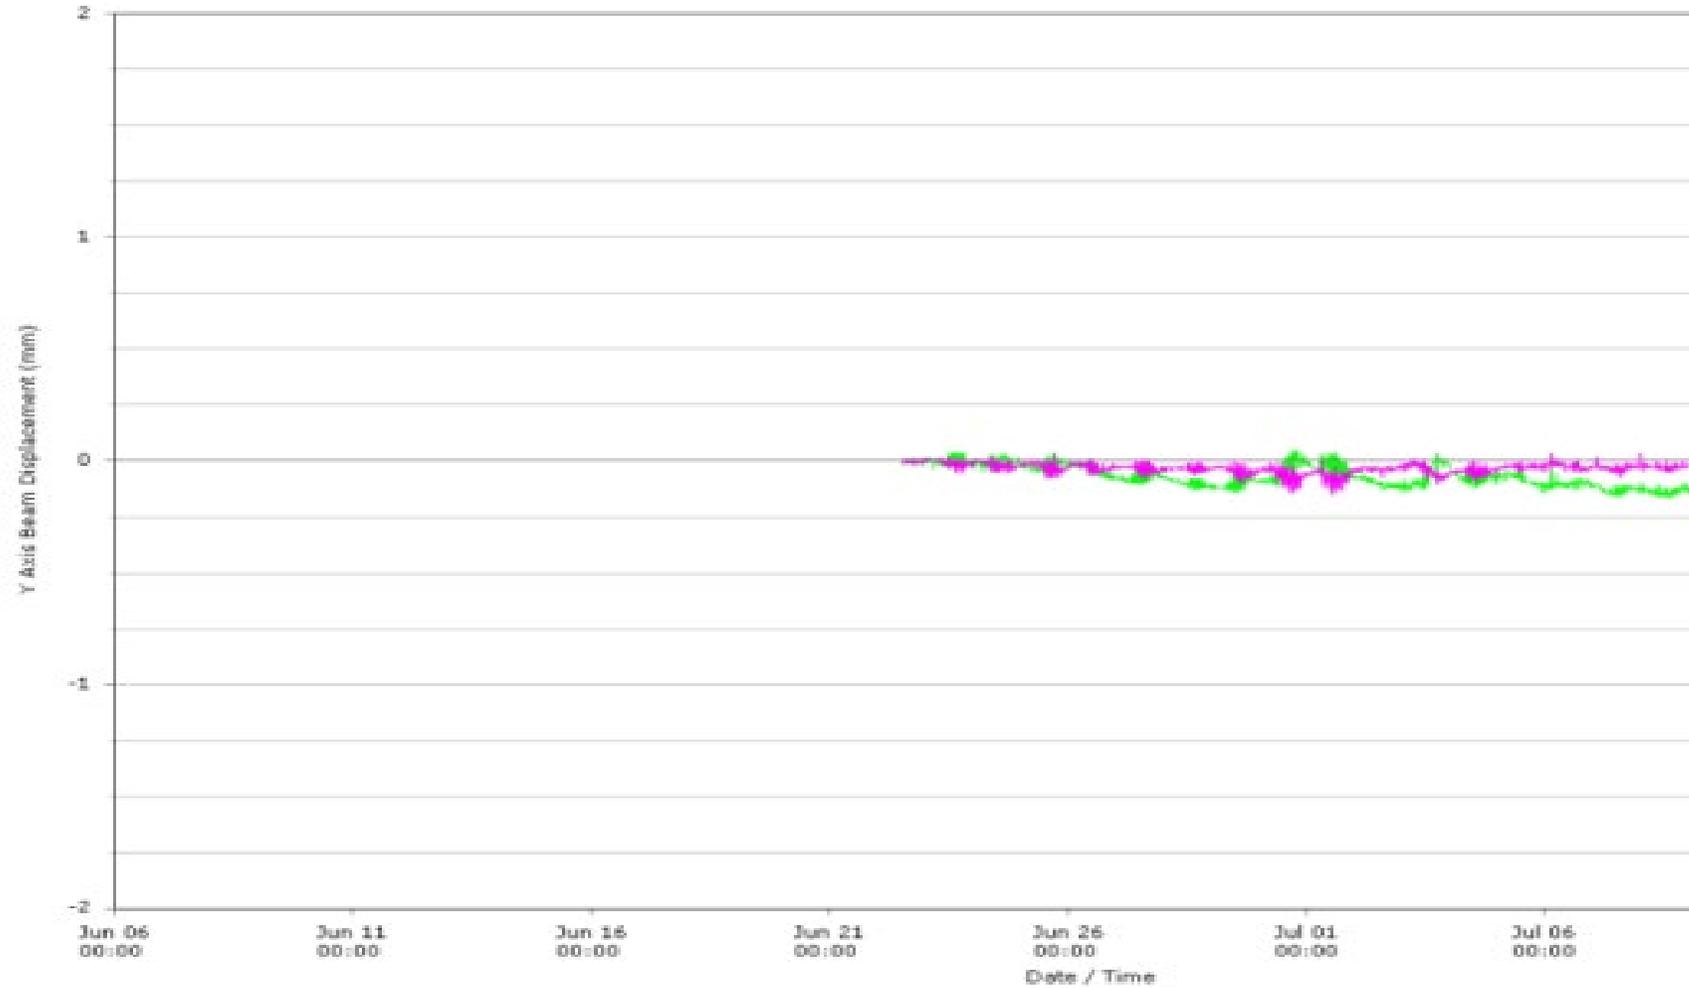

Senceive system

Tunnel Movement Monitoring

- 250 sensors on short beams
 - 5 battery powered gateways with auto switchover back-ups
-providing wire and mains power free monitoring over 3km

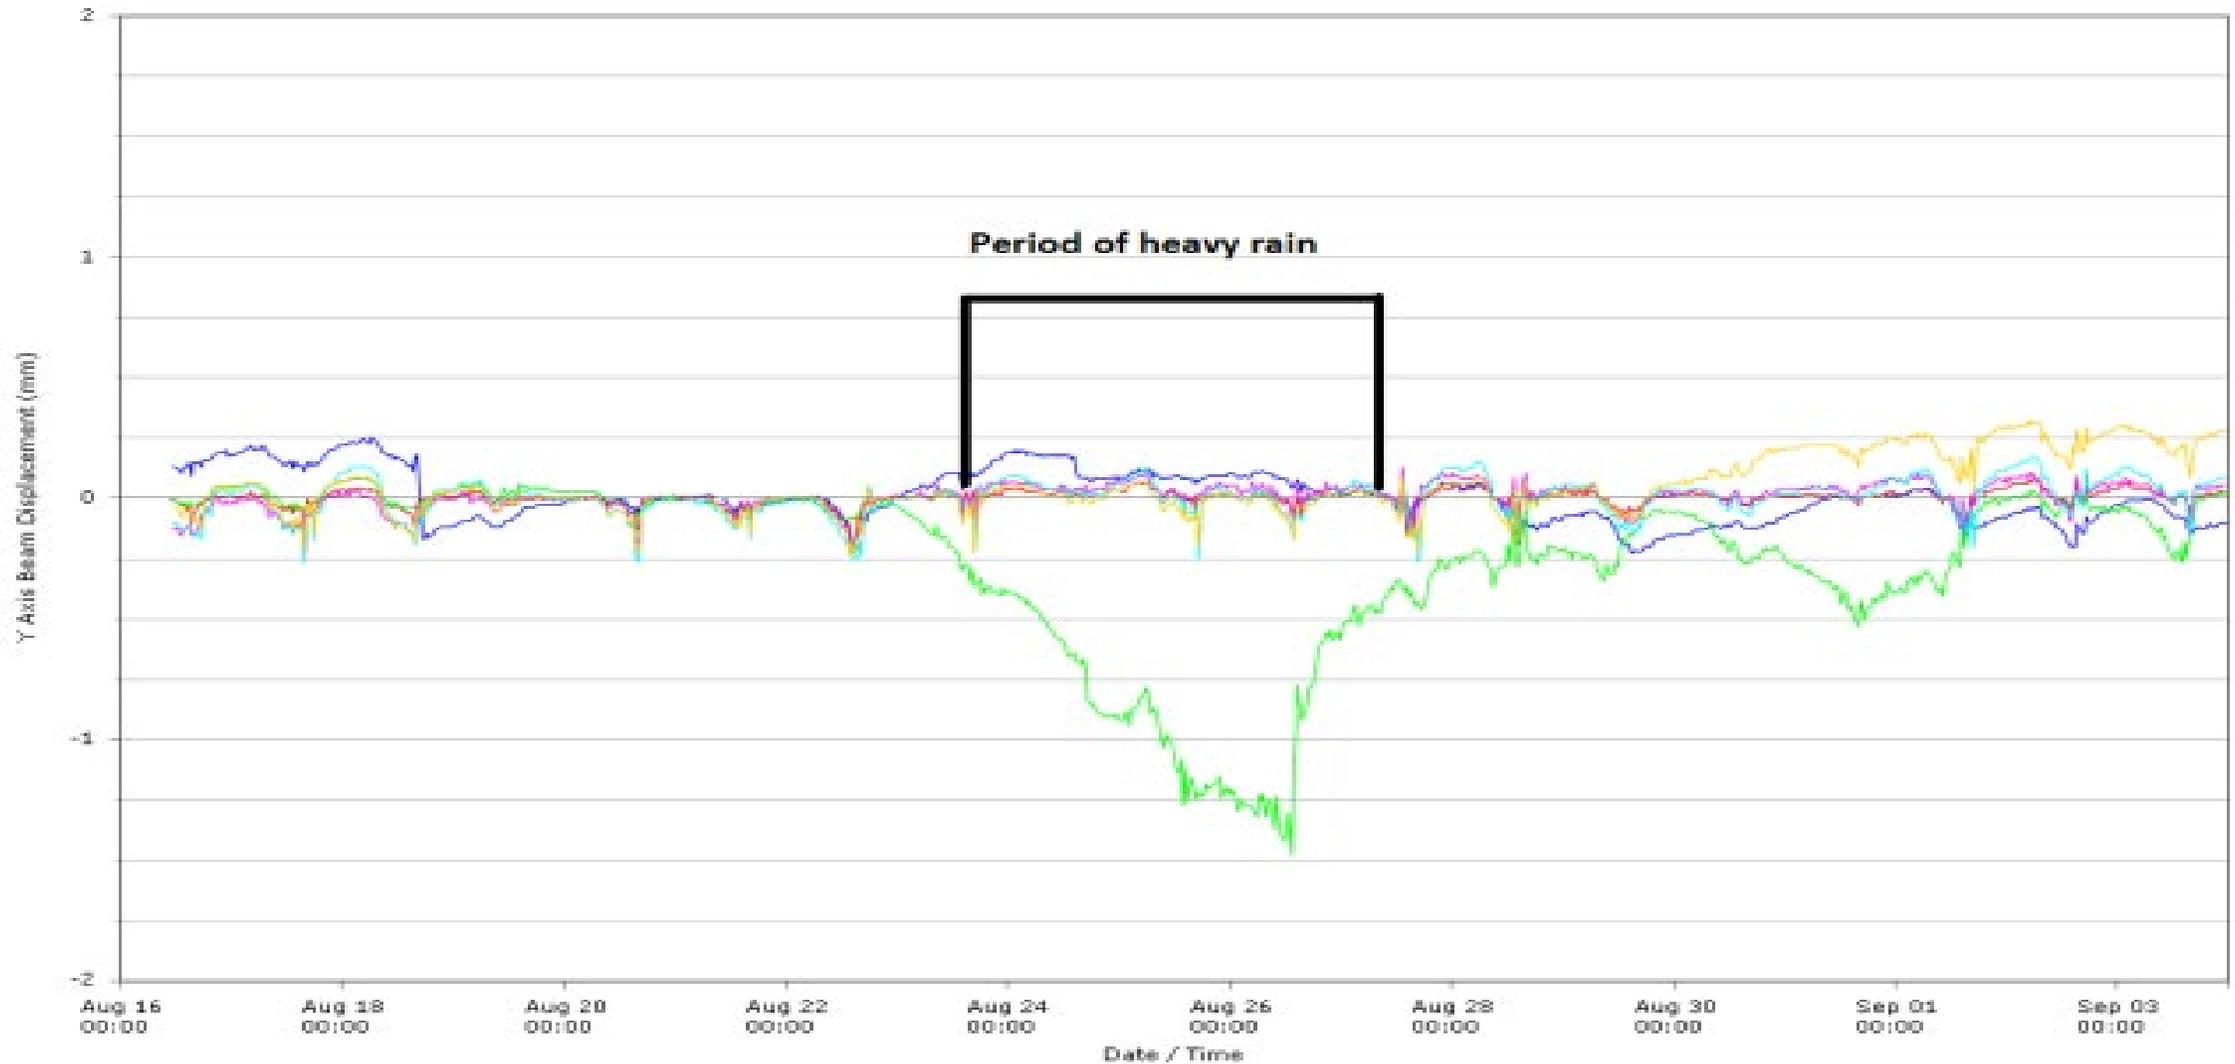

Monitoring Results: Baseline Data

Monitoring Results: During works

Trackbed

Case Study – Crossrail/NR/DLR

Case study: Crossrail/NR/DLR

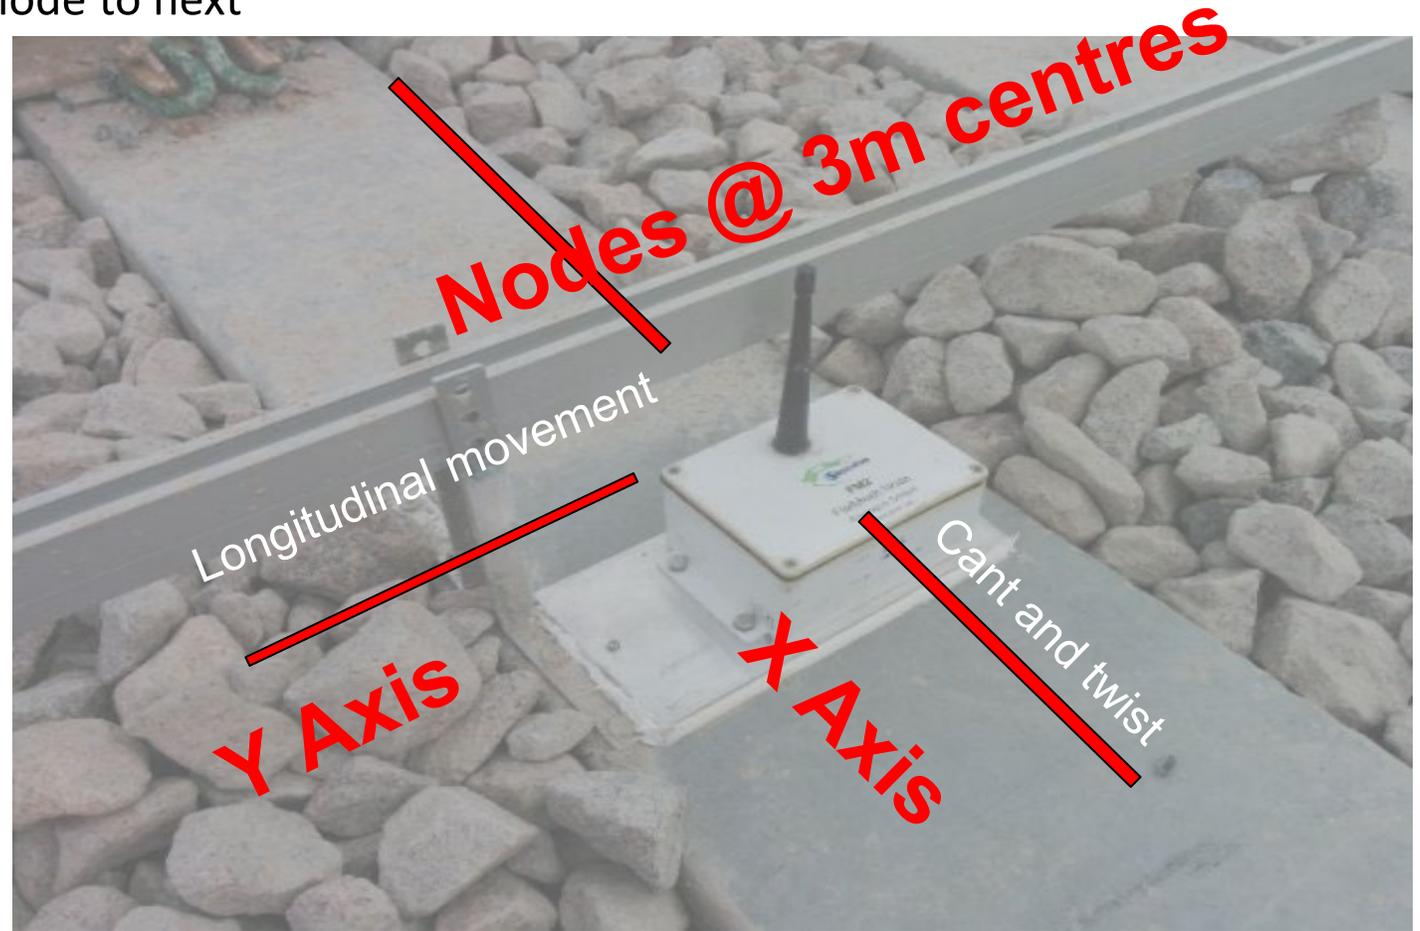

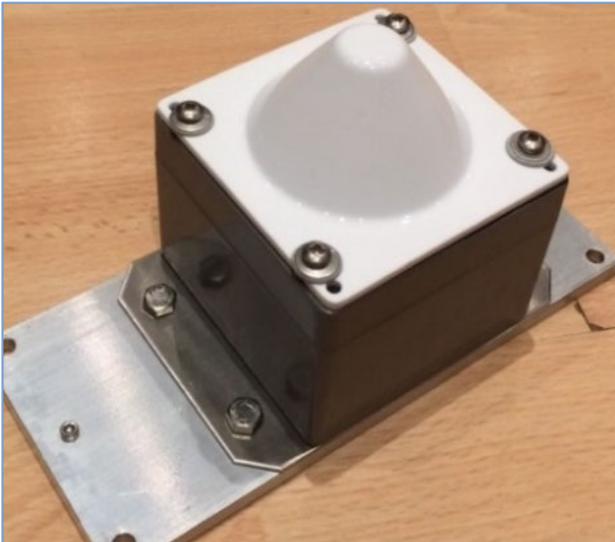

Track Movement Monitoring

- 700 high precision dual axis sensors measuring principally twist and cant on track bed
- Fast installation over 2 shifts

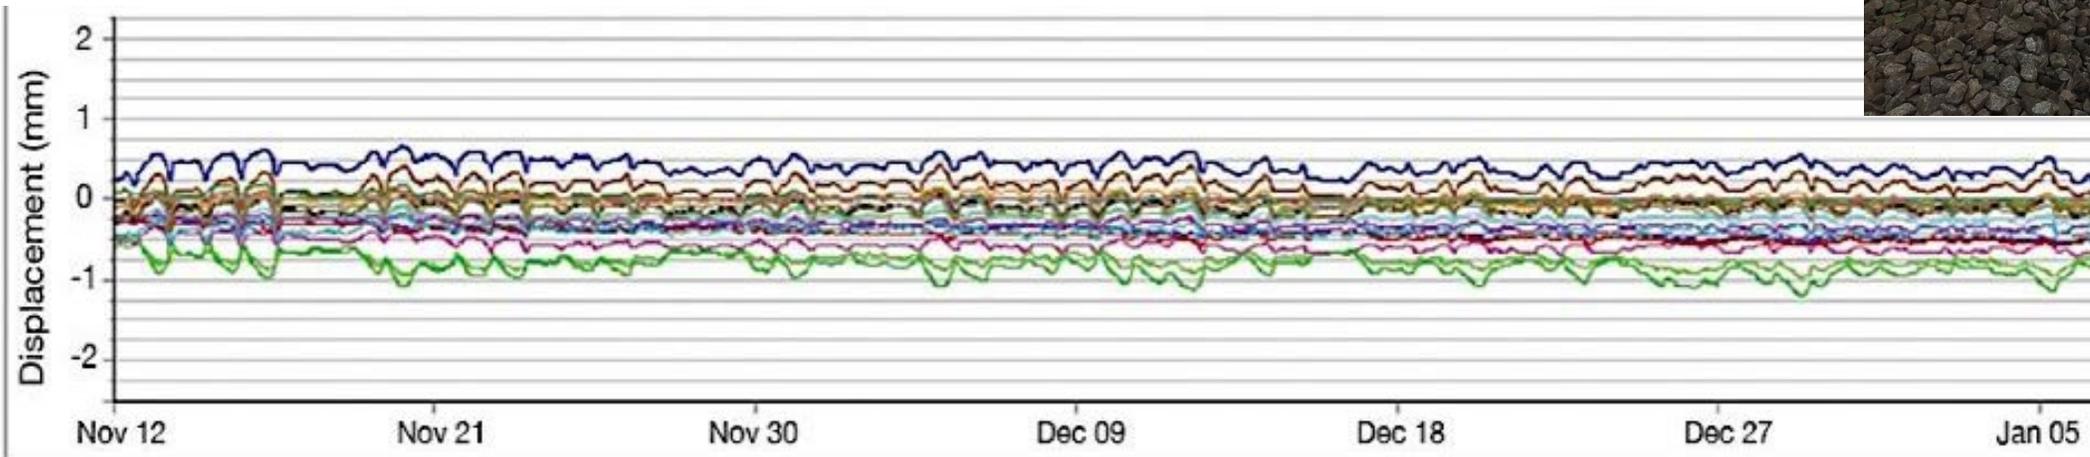

Measuring Cant, Twist and longitudinal

- Measures angle change to calculate cant
- Twist is computation of relationship of one node to next

Stable data in challenging environment

- Stable track bed cant and twist data

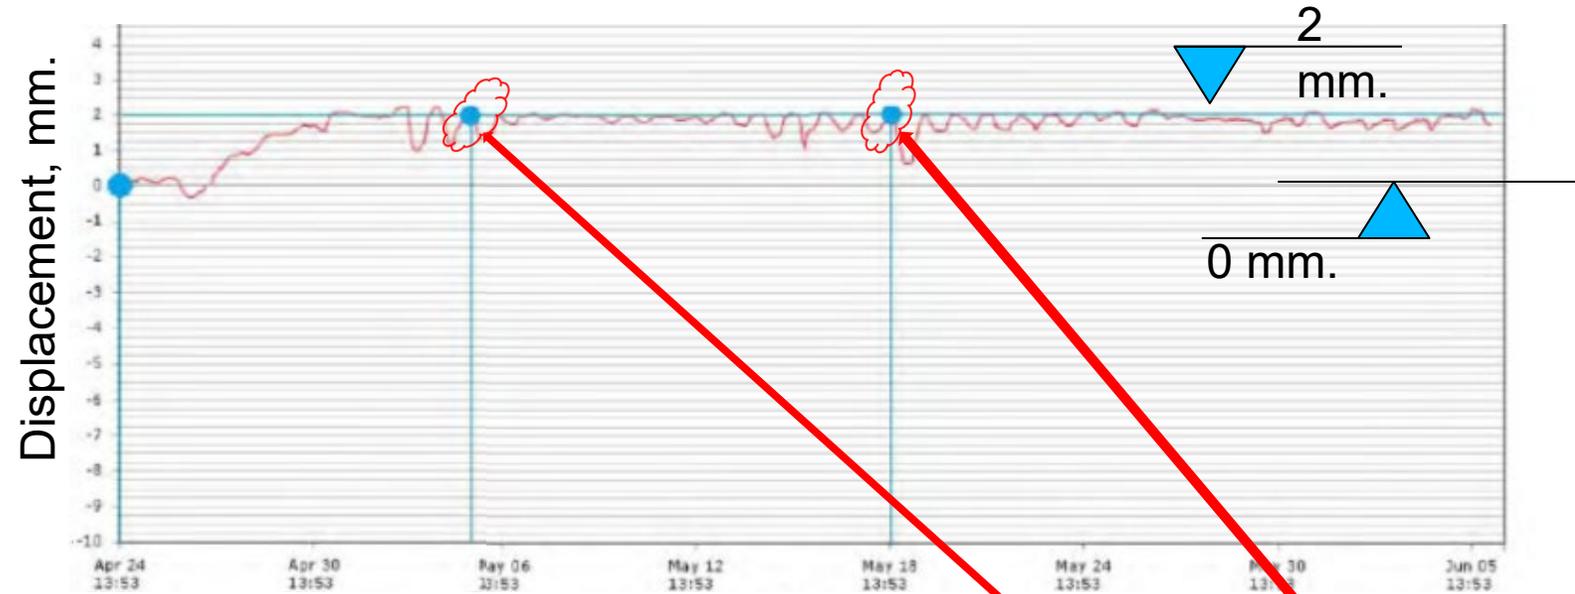

Easy to install

- Flexible install in busy environment

Corroborated by precise levelling

- Accuracy of Senceive data corroborated by manual precise levelling

Date / Time. Manual data
